

Fleet Management

Italsea provides Fleet Management System to Vehicles through embedded devices to track activities and improve operations efficiency and safety.

A huge amount of data is instantly collected and transformed in real-time reports. Real-time alerts could be notified through Web Dashboard, E-mail, SMS.

GEOLOCALIZATION MODULE

- Real-time position;
- Track history;
- Overspeed;
- Geofenced areas;
- Crash/Harsh braking alert;
- Custom events alert;
- Trip odometer distance;
- Maintenance control;
- Trip KPI;
- Wheel pressure;

FUEL-CHECK MODULE

- Fuel consumption;
- Refueling reports;
- Reservoir monitoring;
- Fuel steal protection;

ACCESS CONTROL MODULE

- Driver identification;
- Driving/Work Time;
- Rest/Stop Times;
- Remote Ignition Control;

Service value:

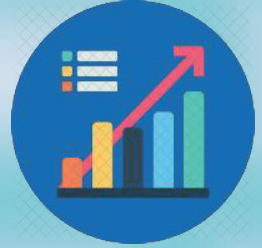

53011 Castellina in Chianti (SI)
Località Bibbiano n.76
Tel. +39 0577 50509
Fax. +39 0577 593295

Efficiency:

- Easy data monitoring through Italsea web site;
- Customer has complete access to Fleet usage and Driver's behavior;
- Alert management and Geofencing guarantees operation quality and safety;
- KPIs and complete tracking provide trip optimization.

Risk mitigation:

- Optimized vehicle traffic provides a less incident occurrence;
- Geolocalization and alerts involves management in operation bad habits;
- No «empty tank» - remote monitoring of fuel level allows correct refueling planning;
- No risk of unauthorized Vehicle drivers.

Cost Saving:

- Geolocalization Module and Fuel-Check Module are included in Fleet Refueling Service;
- Reduced maintenance costs due to optimized Vehicle movements;
- Reduced circulation fine risk and fuel consumption;
- More control and efficient allocation of Vehicles and FTE
